OJT JOURNAL

WEEK 2

Student Name: Ryan Marcly C. Lazona

Year and Course: 3-BSCS

Company: 8Con Academy

Date	Specific Task	Challenges	Learnings	Documentation
June 2, 2025 (Monday)	<ul style="list-style-type: none">Documentation of registration for Tickmill while using desktop and mobile application.Documentation of application of introducing broker inside Tickmill	Creating a dummy account poses a challenge of being hard to verify the identity of the account. We cannot use emails and contact numbers that were already used by other accounts. It takes a long time before the email verifications to be sent due to it being a dummy account.	I learned that we should have documented the registration and IB process while completing it on our accounts, so we wouldn't need to redo everything later using a dummy account. The process is time-consuming and requires extensive verification before we can proceed to the next step. I also realized the importance of having at least one backup contact number for services that require verification.

June 3, 2025 (Tuesday)	Assigning scoring system for the data to be used in 8ConEdge.	The Edge Finder was not giving all the details needed for us to be collected. It only shows the summary and the results and not the data that can be integrated to 8ConEdge.	I have learned that not all data is available in Edge Finder, as it is a paid service and does not easily provide access to sensitive information. To address this, I suggested using other APIs and publicly available data from various websites to fill in the missing parts and complete the scoring system. Additionally, I have learned how to assign different scores to the data to indicate whether they reflect a bullish or bearish outlook.	 <p>The screenshot shows the Edge Finder interface with several data tables. The top table is titled 'MARKET SUMMARY' and includes columns for 'Market', 'Index', 'Volume', and 'Change'. Below it, there are tables for 'MARKET SUMMARY' and 'MARKET SUMMARY'. The bottom table is titled 'MARKET SUMMARY' and includes columns for 'Market', 'Index', 'Volume', and 'Change'.</p>
June 4, 2025 (Wednesday)	Documentation of Step-by-step procedure for creating a Dupoin account in their website and mobile application.	The verifying dummy account takes a lot of time and the email verification could not be sent to the email due to unknown reasons. The contact number used for creating account also could not receive OTP.	I learned the importance of documenting the steps we take when registering an account, so we don't have to struggle with creating a dummy account later. I also discovered that contact numbers and email addresses that have already been used cannot be used to create new accounts.	 <p>The screenshot shows the Dupoin website with a registration form. The form includes fields for 'Email', 'Password', and 'Confirm Password'. There is also a 'Sign Up' button. The website has a dark theme with blue and white text.</p>

June 5, 2025 (Thursday)	Learn and study the endorsement of enrollment system	Reading and trying to understand the documentation was confusing, and I found it difficult to learn properly without seeing the actual system in action.	I have learned that I should take it slow and try to understand the flowcharts, diagrams, and documentations of the enrollment system. It is best to study the files first before trying to come up with the improvements for the system.	 
June 7, 2025 (Saturday)	<ul style="list-style-type: none"> Usher for the workshop Conduct the icebreaker during the presentation 	<ul style="list-style-type: none"> Some of the people are a bit distant and does not want to be disturbed. Some of the guests are not that enthusiastic and participative during the icebreaker 	I learned that I should try lighten the mood first and explain the instructions for the icebreaker more clearly. I should also mention that they will receive a prize if they answer correctly.
